## Association News.

The fall work of the Association will begin in the next few days and it is hoped that by the first of the month a large number of educational classes will be organized, the gymnasium work renewed, a Success Club organized, and many other activities that will mean much for the men of the city.

The Association now has 600 members and no doubt a large number of these will be interested in some form of class work. The general plan is to have groups of men who are interested in any one subject get together and form a class with a teacher. Several bible classes will be organized.

Classes in short-hand, penmanship, book-keeping, arithmetic and grammar are contemplated. A group of young men will probably form a Success Club for mutual improvement. The gymnasium classes will be graded to suit the needs of all. A series of practical talks and lectures will be given apart from the regular star course.

W. T. Perkins came to see us Monday morning and lugged in a pumpkin that weighed about four hundred pounds. It is of the "Racer" variety, so called on account of the rapidity with which the vines grow, and a pumpkin from one of these vines is frequently so large that it takes several barrels of flour to make one of them into pies. Mr. Perkins has the thanks of the Eye-Witness which are commensurate with the size of the pumpkin.—Elkhart Eye-Witness.

## HAMLIN GARLAND'S UNIQUE OCCUPATION.

Novelist Hamlin Garland is about to enter upon the duties of the position to which he was recently appointed by the government. He will endeavor to straighten out the much-mixed and often-changed Indian names, so that there may be some systematic method of recording their possessions. Mr. Garland ought to be exceptionally well qualified for the work in hand, for his reputation has been made through his novels of life on the plains and he has frequently lived for months at a time with the red men.

## For One-Half.

You can complete a thorough, practical, extensive course in book-keeping, shorthand and typewriting at Tyler College, Tyler, Texas, at one-half the cost of any other school.

Why? That's easy. No theory work in book-keeping, no copying each set two to four times, but actual face to face business from start, learning by doing.

1903 methods, not those of 1850. No 500 rules, 500 exceptions, 3000 logograms in shorthand, but 13 rules and 9 logograms. 1903 shorthand, not that of 1877.

Typewriting new, too—a simple invention that forces the pupil to use the touch method.

The above systems are theirs; the author one of them. The college one of the largest, with 750 students last session. Will enroll 900 to 1000 students this year. Has enrolled students from 8 states during the past two weeks.

Write for their large 1903-04 catalogue.

## Books Not Here.

Considerable annoyance is caused by the fact that some of the new text books adopted by the State board have not been received by the local dealers. They are expected daily, however.

This same condition prevails in nearly every town in Texas.

## Sacrifice Sale!
